YOUR ANSWERS. YOUR PERSPECTIVE.

Colour-perception

Task profile

A wholly fictional example. The values illustrate a report and say nothing about you.

ANSWERED: 20 / 20 | 1 PROFILE AREAS

1

Colour comparisons

15 / 20 answered tasks solved correctly. For example, review task 1 and its solution in the appendix.

2

Your profile remains open

There are not enough complete areas for another key insight. Your available responses appear in the appendix; skipped responses are not replaced.

3

Your profile remains open

There are not enough complete areas for another key insight. Your available responses appear in the appendix; skipped responses are not replaced.

Your first small step

Record the display and lighting conditions before comparing results.

02 / YOUR REPORT

Your profile at a glance

The bars show correct solutions as a proportion of answered tasks. Skipped tasks are shown separately.

Colour comparisons **15 / 20**

0% 20 / 20 answered 100%

How to read the chart

A rate of 50% means half of your answered tasks were solved correctly. It does not mean you performed better than half of other people.

No area value is shown if fewer than 80% of its items are answered. This is a display rule for incomplete data, not a performance or health threshold.

03 / YOUR REPORT

Connecting your responses

Observations from your responses, not fixed characteristics.

Your result gives correctly distinguished screen patches under your current display conditions. Screen settings, brightness and surroundings can affect it. This is not a colour-vision disorder test.

Your task result: 15 / 20

This is how many answered tasks you solved correctly. The result applies only to these tasks under your conditions. It is neither a population rank nor proof of an ability or fitness.

Compare the solution steps in the appendix: where does your approach match and where does it differ? An error can have many causes; the report does not establish one.

04 / YOUR REPORT

Colour comparisons

Trace your responses and connect them with everyday situations.

These screen tasks compare colours. Display, lighting and viewing conditions affect them; they do not replace a vision test.

Your response value **15 / 20**

0% 20 / 20 answered 100%

Correct/answered counts accurately distinguished colour patches under your current screen conditions. Skipped tasks are separate. Brightness, display and surroundings can change the result; it does not diagnose a colour-vision disorder.

Correctly solved: 15 / 20. Not answered: 0. The result applies to these tasks under your conditions, not to your general ability.

Two concrete responses

Item 1: Patch group 1: Which patch differs in colour from the other three?

Your response: 1

Item 20: Patch group 20: Which patch differs in colour from the other three?

Your response: 3

A prompt for further reflection

Record the display and lighting conditions before comparing results.

When does this fit me - and when does it not?

05 / YOUR REPORT

Your values clearly explained

Colour comparisons

Numerator and denominator

15 / 20 means: this many answered tasks were solved correctly. Skipped: 0.

A profile without a ranking

The task selection is not normed on a representative population. Practice, aids, screen and situation can affect results. The result does not establish an IQ, a medical finding or occupational fitness.

06 / YOUR REPORT

Your own next step

An optional everyday idea, without a performance target.

1

Today: note one situation

Starting point: Colour comparisons. Choose a response in this area and note when it last fitted. A counterexample is just as useful.

2

This week: explore a perspective

Record the display and lighting conditions before comparing results.

3

Afterwards: decide for yourself

What fits you and what does not? Record one insight and decide whether to keep anything. You do not need a higher score or another purchase.

My situation and what matters to me:

My optional idea and a suitable time:

What I would like to take from this:

07 / YOUR REPORT

Method and limitations

What the report is based on

Compare colour patches on your screen. A playful comparison that neither detects nor rules out colour vision deficiency.

Your responses are summarised according to the fixed rules explained here. Examples refer to the item numbers shown. No automated detection or assessment of a medical condition takes place.

Keeping the limitations in mind

Screening and self-reflection do not replace a medical or psychological assessment. Original reflection questions are not clinically validated. Each test page explains its method and limitations.

A profile does not cover every aspect of a person. It is a snapshot of your responses. Important relationship, career or other life decisions should not depend on it alone.

> **If you would like support**
>
> If symptoms are affecting you, seek support from a qualified health professional. In immediate danger, contact your local emergency services or nearest emergency department. Help information is available without an email address or payment.

Questionnaire version: 2026-10-29.26 | Report format: 2026-10-29.28

APPENDIX / YOUR REPORT

Your responses in full

Every scored response remains traceable. Skipped items are explicitly identified.

1 **Patch group 1: Which patch differs in colour from the other three?**
Colour comparisons | 1
Solution and explanation: Patch 3 has a different colour value. Display and lighting affect this task.

2 **Patch group 2: Which patch differs in colour from the other three?**
Colour comparisons | 1
Solution and explanation: Patch 1 has a different colour value. Display and lighting affect this task.

3 **Patch group 3: Which patch differs in colour from the other three?**
Colour comparisons | 3
Solution and explanation: Patch 3 has a different colour value. Display and lighting affect this task.

4 **Patch group 4: Which patch differs in colour from the other three?**
Colour comparisons | 1
Solution and explanation: Patch 1 has a different colour value. Display and lighting affect this task.

5 **Patch group 5: Which patch differs in colour from the other three?**
Colour comparisons | 1
Solution and explanation: Patch 3 has a different colour value. Display and lighting affect this task.

6 **Patch group 6: Which patch differs in colour from the other three?**
Colour comparisons | 1
Solution and explanation: Patch 1 has a different colour value. Display and lighting affect this task.

7 **Patch group 7: Which patch differs in colour from the other three?**
Colour comparisons | 4
Solution and explanation: Patch 4 has a different colour value. Display and lighting affect this task.

8 **Patch group 8: Which patch differs in colour from the other three?**
Colour comparisons | 2
Solution and explanation: Patch 2 has a different colour value. Display and lighting affect this task.

9 **Patch group 9: Which patch differs in colour from the other three?**
Colour comparisons | 3
Solution and explanation: Patch 1 has a different colour value. Display and lighting affect this task.

10 **Patch group 10: Which patch differs in colour from the other three?**
Colour comparisons | 2
Solution and explanation: Patch 2 has a different colour value. Display and lighting affect this task.

Your responses in full / CONTINUED

11 **Patch group 11: Which patch differs in colour from the other three?**

Colour comparisons | 4

Solution and explanation: Patch 4 has a different colour value. Display and lighting affect this task.

12 **Patch group 12: Which patch differs in colour from the other three?**

Colour comparisons | 3

Solution and explanation: Patch 3 has a different colour value. Display and lighting affect this task.

13 **Patch group 13: Which patch differs in colour from the other three?**

Colour comparisons | 3

Solution and explanation: Patch 4 has a different colour value. Display and lighting affect this task.

14 **Patch group 14: Which patch differs in colour from the other three?**

Colour comparisons | 3

Solution and explanation: Patch 3 has a different colour value. Display and lighting affect this task.

15 **Patch group 15: Which patch differs in colour from the other three?**

Colour comparisons | 2

Solution and explanation: Patch 2 has a different colour value. Display and lighting affect this task.

16 **Patch group 16: Which patch differs in colour from the other three?**

Colour comparisons | 1

Solution and explanation: Patch 1 has a different colour value. Display and lighting affect this task.

17 **Patch group 17: Which patch differs in colour from the other three?**

Colour comparisons | 3

Solution and explanation: Patch 4 has a different colour value. Display and lighting affect this task.

18 **Patch group 18: Which patch differs in colour from the other three?**

Colour comparisons | 4

Solution and explanation: Patch 4 has a different colour value. Display and lighting affect this task.

19 **Patch group 19: Which patch differs in colour from the other three?**

Colour comparisons | 1

Solution and explanation: Patch 1 has a different colour value. Display and lighting affect this task.

20 **Patch group 20: Which patch differs in colour from the other three?**

Colour comparisons | 3

Solution and explanation: Patch 3 has a different colour value. Display and lighting affect this task.
